Smile Makeover

What A New Smile Can Do For You

1. A happier you
2. A more confident you
3. A healthier you
4. A beautiful you
5. A successful you

What Is a Smile Makeover & What Are The Benefits?

A smile makeover is the process of improving the appearance and health of your teeth and gums through a series of dentistry procedures. During our initial assessment we'll assess the health of your jaw, gum foundation and teeth. Anyone who wants to change the shade, size, shape, and/or alignment of teeth, while also repairing dental damage, replacing old dental work, and/or restoring oral health can achieve all of their goals with a smile makeover.

Some of the benefits include:

- Improves confidence
- Brighter, whiter teeth
- A more even and proportional gumline
- Longer, more optimally shaped teeth
- Straighter smile
- Reduction of gaps between teeth
- Repair of dental damage
- Replace aging/damaged restorations
- Enhances facial aesthetics
- A more youthful look

Smile Makeovers By Dr. Villadiego

Smiles brought back to life: patients with life changing transformations (see our smile gallery and video patient testimonials below). You will see cases of severely worn teeth rebuilt back to their original size and shape. There are several examples of old, fading, and stained teeth brought back to their dazzling white.

From bonding and porcelain veneers to all porcelain crowns and dental implants, Dr. Villadiego Cosmetic Dentist has created beautiful, functional smiles that will last for years to come. A smile makeover offers remarkable benefits! If you would like to find out if you are a candidate for this transformative service, contact our dental office today at (818) 341-1345.
